Front End Engineer / Full Stack Engineer for hire in the NYC metro region.
I speak English and Spanish fluently!

Proficiencies

Javascript ES6+, HTML, CSS, SASS, Node, npm, Webpack, Vite, React.js, GatsbyJS, Redux, Express, MongoDB, Mongoose, Prismic CMS, Apollo GraphQL, React Native, Mocha, Chai, Storybook, Jest

Work Experience

HalfmoonBK – Lead Developer & Site Designer – February 2020 - Current
Key Tech: React, GatsbyJS, Bulma, SASS, Prismic, GraphQL, Firebase, Apollo, more

- Led Halfmoon's creative discussions for the relaunch site's updated brand identity, page layouts, editorial options
- Led a two-man team through full-stack implementation for each page type, from design to wireframe to live page
- Planned and implemented a new set of database schema using Prismic CMS with GraphQL through Gatsby around current & desired future data relations
- Developed a brand new statically-generated site using Gatsby that reduced load times by over 5000% which allowed Halfmoon to expand the relaunch site's content and informational options
- Built a brand new web radio interface that features the ability to switch between playing recorded mix broadcasts from the Halfmoon's archives and live internet sets
- Created 11 editorial layout sections with 59 variations and sub-variations that empowered editorial staff to publish vibrant, engaging articles

Bereavement Period – March 2019 - February 2020
During this period, I kept my skills up by working on personal projects and some NDA-bound contract work.

ProjectMercury – Fullstack React Developer, Contract – January - March 2019
Key Tech: React, GatsbyJS, Bulma, SASS, Airtable, Zapier, react-spring

- Collaborated with Alright Studio's project design lead to bring their website concept to life
- Led the two-man team in implementing the frontend using React as the framework, with a mixture of the *Bulma* CSS Framework and custom SASS for styling
- Provided Airtable as a database solution for collecting submission form data

Projects

CitySnapper – *Fullstack Dev & Design Lead, Capstone Project* – Video Presentation – Github
Key Tech: Sketch, JS, CSS, React Native, Redux, Firebase

- App for NYC tourists that guides them to historic locations to visit. Recreate historic photos and answer fun quizzes!

Speakr – *Solo Developer & Designer, Fullstack Hackathon Winter 2018* – Video Presentation – Github
Key Tech: Sketch, JS, CSS, React Native, Redux, Cloud Vision, Google OAuth

- App *for language learners to study their world on the go. Snap a picture, create translations & flashcards*

Education

Fullstack Academy of Code – *Software Engineering, NYC* – September to December 2018
A 17-week, 553 hour, NYC-based Software development program centered around full-stack JavaScript development.

SUNY Binghamton University – *BA Graphic Design, BA Asian American Studies, Japanese* – Graduated Winter 2012
Degree Focuses: Print Design, Media Design, UI/UX Design
